

Registering Game Consoles

To use your game console over the network, it must first be registered on Bryant University's network

Step 1: Find MAC address for your console (see below)

Step 2: Go to <http://register.bryant.edu/>

Agree to the terms, then select *Bryant University Game Console Registration*.

Login using your username and e-mail password, then at the bottom enter the MAC (Physical) address and select *your console*. Click *Add*.

XBOX

1. Turn on the Xbox console with no game disc in the disc tray.
2. From the Xbox Dashboard, choose Xbox Live.

These steps assume you cannot connect to Xbox Live until you finish configuring your Xbox console to use your PC's MAC address. Therefore, you should receive the following message: "Could not connect to Xbox Live. Do you want to troubleshoot your network connection?"

3. From the Connect Status screen, select Settings. The 12-digit number at the bottom-right corner of the Network Settings screens is the MAC address of your Xbox console.

XBOX 360

1. Access the Xbox Guide by pressing the Xbox Guide button on the Xbox 360 controller. The Guide button is the silver button in the center of the controller that has the green "X" on it.
2. Press the Y button on the controller to enter the Xbox 360 Dashboard.
3. Go to the System area of the Dashboard.
4. Select Network Settings and then select Edit Settings.
5. Select Additional Settings and then select Advanced Settings.
6. At the bottom of this screen you'll see the heading "Wired MAC Address". This is your MAC address.

SONY PS2

1. Load the Start-up CD in the Playstation2.
2. Make sure you have the network cable disconnected.
3. Walk through the Start-Up CD until it starts testing the connection. Since the network cable is disconnected the test will fail.
4. You can now press the select button, which will display the Hardware MAC Address. The 12-digit number is the MAC address of your PS2.

PS3

1. From the main menu screen, go to *Settings*.
2. Go to *System Settings*.
3. Go to *System Information*. Your MAC address will be listed here.

PSP

1. Navigate to *System Settings*.
2. Go to *System Information*, which is where the MAC address is listed.

GAMECUBE

1. Remove the GameCube's broadband adapter from the console.
2. Printed on the underside of the adaptor is a MAC address.

NINTENDO WII – Note: Does not work on wireless (wired only)

1. From the Wii Menu, select *Wii Options*.
2. Select *Wii Settings*, then scroll to the right to *Wii System Settings 2*.
3. Select *Internet*, then select *Console Information*. The MAC address is displayed here.
