APPLIED PSYCHOLOGY

WWW.BRYANT.EDU/AREASOFSTUDY

An understanding of psychology can be applied to every aspect of professional and personal life. Having an appreciation for how people think and why they act (or do not act) is critical to creating successful relationships.

The Applied Psychology major offers a deep understanding of self, other people, and how to apply that knowledge to a broad range of professional fields through 12 courses of in-depth study. Beginning in their first semester, Applied Psychology majors benefit from ongoing academic advising and career guidance from a full-time Bryant psychology faculty member.

The Psychology minor offers an introduction to human behavior and psychology theory through four required courses.

Students also benefit from a Business Administration minor, allowing them to make a deep impact in any organization immediately upon graduation.

ENGAGED LEARNING + APPLIED SCHOLARSHIP

The College of Arts and Sciences and the College of Business at Bryant offer a rigorous academic curriculum, and a depth and breadth of study that encourages students to explore new fields and expand their thinking. In fact, the unique integration of business and liberal arts is a hallmark of a Bryant education – business students study liberal arts and liberal arts students study business. This foundation educates the *whole* student and enhances communication skills; leads to a more comprehensive understanding of global, cultural, and ethical issues; and develops critical thinking and decision-making skills.

Bryant's comprehensive curriculum allows you to develop your intellectual passions and define a clear path for success.

PRACTICAL EXPERIENCE

Bryant's Applied Psychology major helps you develop a strong foundation in psychological theory that is grounded in the practical application of those principles through day-to-day fieldwork, student/faculty-led research opportunities, and internships. Whether it is a research project with a professor or an internship at organizations such as Big Sisters of Rhode Island, the Rhode Island Governor's Commission on Disabilities, the Rhode Island State Government Internship Program, or the Samaritans, you will have hands-on experience in the field before graduation.

“Majoring in applied psychology here at Bryant ensures that you will get a quality education that you will be able to immediately apply in your chosen profession. Understanding how the human mind works will help you in *any* profession.”

Joseph Trunzo, Ph.D., Associate Professor, Department of Applied Psychology
