

HTML Code Reference

Standard HTML Tags

The following is a partial list of HTML tags. The list was derived from a listing of all HTML tags. Since all editor operations within the WCM are applied inside the page's <body> tag, all tags that exist above the body tag were excluded. Also, tags for frames, styles, and scripts were not included. From that list, all tags that were NOT compatible across all platforms were removed. For an in-depth overview of HTML tags and their application visit W3 Schools' web reference site at <http://www.w3schools.com>.

Tag	Description	Example
<!--...-->	Comment	n/a
<a>	Anchor	Web Content Manager
	Bold Text	Web Content Manager
