

Visualize Your Data: Tableau for Beginners

Welcome to our “Visualize Your Data: Tableau for Beginners” session! To ensure you get the most out of this session, we're guiding you through the process of installing Tableau on your personal computer. Tableau offers free academic licenses to students and faculty, allowing you to explore and utilize this powerful data visualization tool.

Step 1: Access the Academic License

Visit Tableau's Academic Program page: [Tableau for Students](#).

This page provides all the necessary details about the free academic license and how to apply for it.

Step 2: Apply for Your Free License

Click on the "Get Tableau for Free" button.

You'll be asked to fill out a form with your academic details. Ensure you have your university email and student ID handy.

Step 3: Install Tableau

Once your application is approved, you'll receive an email from Tableau with a license key and a link to download the software.

Follow the link to download the Tableau Desktop version suited for your operating system (Windows/Mac).

Step 4: Activate Tableau

After installation, open Tableau Desktop. You will be prompted to enter the license key you received.

Enter the key to activate your product and start using Tableau.

Step 5: Prepare for the Workshop

Familiarize yourself with the Tableau interface by exploring on your own or watching introductory videos on Tableau's website.

Ensure your software is functioning correctly before the workshop for a smooth learning experience.

We're excited to see how Tableau will enhance your data visualization skills. If you encounter any issues during installation or have any questions, please don't hesitate to reach out.

Looking forward to a productive session with you all!
